THREATS TO FOOD SAFETY

Food contamination can be...

BIOLOGICAL

When a food is contaminated by a living organism or a substance produced by a living organism.

PHYSICAL

When a foreign object enters a food at any stage of the production.

CHEMICAL

When a food is contaminated by contact with a chemical substance. Chemical contaminants can be "natural" or "artificial".

Is there a need for further education?

Agdaily.com

Who participates in further education in Agricultural Production / Cattle

DEN EUROPÆISKE UNION
Den Europæiske Socialfond

DEN EUROPÆISKE UNION
Den Europæiske Fond
for Regionaludvikling

Vi investerer i din fremtid

Year:	2017	2018	2019
Participants:	24,309	26,035	16,477

How many can we then relate to Livestock / Cattle?

Livestock production 9% (1,475 participants)

Agricultural production 21% (3,457 participants)

Unfortunately this is *all* Livestock education...

Is there a need for further education?

New legislation, environmental demands, climate regulations.

- This calls for education

Family Farm Succession – it can be difficult to manage, but to a start there is a need for a successor.

- This calls for education

Is there a need for further education?

Statement:

Foreign employees may find it difficult to take up education with their employer and the farmer does not take initiative towards education

Maybe due to cultural differences?

The farmer does not see the need for training of foreign employees, since everyday life already works fine?

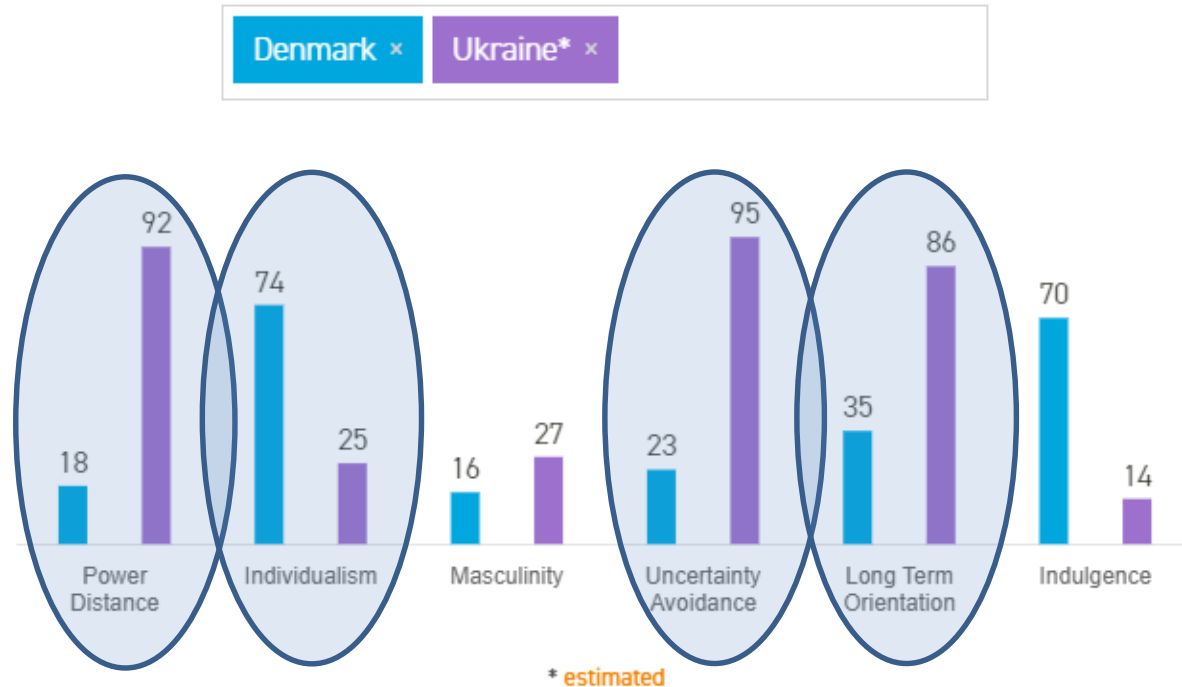

Regular employee appraisal interview is not conducted?

So what do you do?

Understanding culture DK / UA

How do we see and act on management?

What do we focus on?

Is there a need for further education?

The benefits of education

- New and current knowledge
- Better management and overall understanding of the production
- The employees can share knowledge on the farm
- You can be potential successor – instead of a valued employee that leaves the country again

And now a real case : *Vladyslav Garbuz*
