

European Wheat Rust Early Warning Campaign 2026

Monitoring rust outbreaks across Europe

March – June 2026

The RustWatch network and the Horizon Europe project IPMorama are coordinating a European wheat rust monitoring campaign using the **Wheat Rust Survey App**.

The initiative supports coordinated monitoring of wheat rust diseases and strengthens early warning systems across Europe.

Who Can Contribute

Extension & advisory services

Plant breeders & seed companies

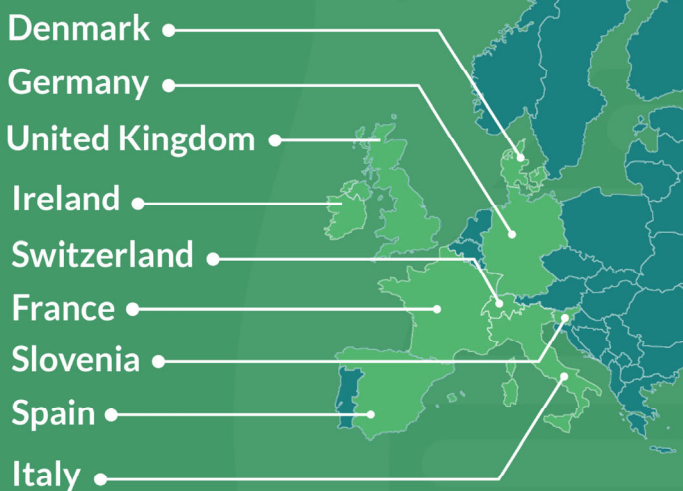

Researchers & crop protection specialists

Field trial & monitoring networks

Monitoring across Europe with partners in:

Report Observations

Using the **Wheat Rust Survey App**, report observations of:

- ✓ Yellow rust
- ✓ Leaf rust
- ✓ Stem rust
- ✓ No disease detected

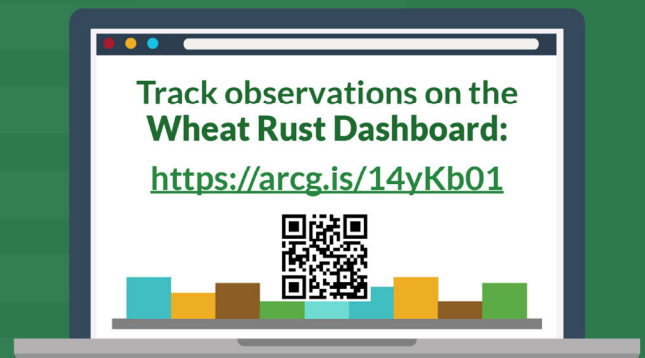

Please include:

- Location
- Cultivar name
- Growth stage
- Field type
- Disease score
- Photo of the observation

Submit observations:
<https://arcg.is/nn5r40>

View Results

Alerts will also be shared through GRR, IPMorama, and regional agricultural knowledge platforms.

Report observations and help strengthen Europe's wheat rust early warning system.
